## CALL FOR PAPERS AND PARTICIPATION

**Istanbul University**

**Turkish Informatics  
Foundation**

**Istanbul Kültür  
University**

**Turkish Informatics  
Society**

Learning, which originates in a desire for knowledge, has always been fundamental in the shaping of social life. It has lost nothing of its importance with developments in technology. Under the influence of Information Technology (IT), learning has acquired new dimensions, discussed quite regularly on many levels.

The aim of this conference is to discuss future innovations in the field of learning. The conference will encourage a debate on strategies for the development of the most effective methods, strategies, techniques, and technologies that will serve humankind in the lifelong learning process. Human beings are, after all, centrally involved in learning, and its fundamental *raison d'être*.

"E-learning", which in itself is an innovation, promises to acquire even greater importance in the future. We are therefore calling for contributions (research papers\* and posters) focusing on "e-learning", and examining the following issues through original research and exploration.

\* Selected papers from the conference will be published in the international reviewed journals
