

Sushil K. Sharma is a Professor and Chairperson of the Department of Information Systems and Operations Management at Ball State University, Muncie, Indiana. He has the distinction of having earned two doctoral degrees— one in management information systems (MIS) and the other in management. Sharma has authored 8 books and more than 100 refereed research papers in many peer-reviewed national and international MIS journals, conferences, proceedings and books. His research, primarily involves e-commerce, computer-mediated communications, information systems security, e-government, ERP systems, community and social informatics, human computer interaction (HCI) and knowledge management.

Dr. Sharma has been the recipient of several research grants, and has also won numerous professional honors. His most recent co-authored work on computer security won him acclaims and he has a patent pending for this innovative work. His work on ‘Cyber Slacking’ has also been widely covered by several media and news channels and has often been interviewed for his work. He is often invited to speak at seminars and colloquia by international professional and academic groups on topics such as; E-learning, computer and network security, ERP implementations, e-adoption, and e-government.
